TO SEEK TO SAVE

BLOODLINE

A Blood Mobilisation System

Try Pitch

1.8%

Of Singapore’s population are blood donors

15

Units of blood are used every hour in Singapore

60%

Of donors never return within the year

Try Pitch

The Worsening Situation

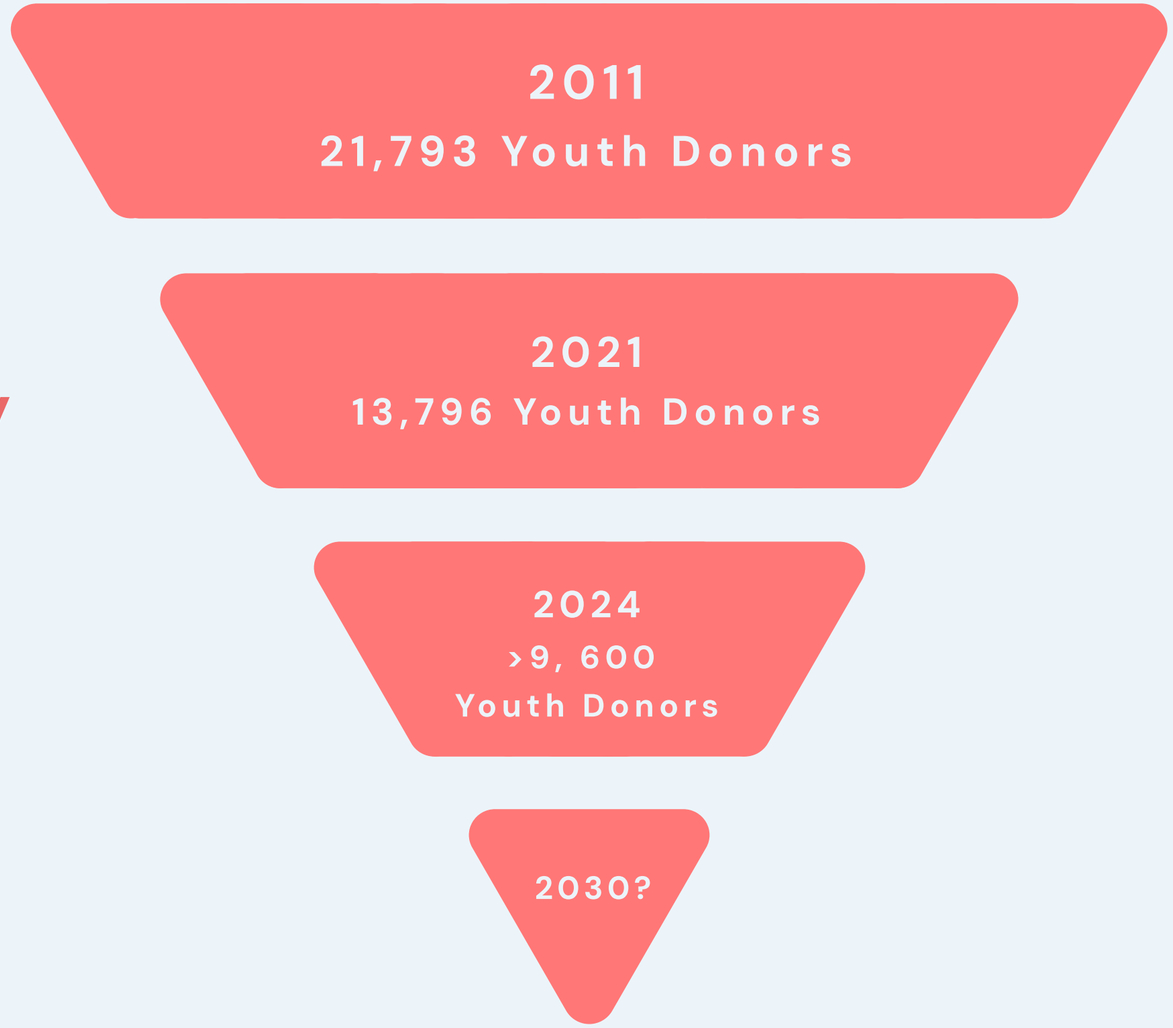

Demand

Ageing Population
Rising Cancer Cases

Supply

Less Youths
Sickness

Youth blood donations have more than halved in a decade. As the population ages and **demand rises toward 160,000 units a year**, the **donor pool is eroding** faster than recruitment can replace it

Try Pitch

SUPPLY INSTABILITY

“In 2023, Blood Stocks Fell To Less Than 6 Days”

During the holiday season in Early 2023, supply dipped to its lowest. This drop pattern repeats every year during CNY, Exam Seasons, Holidays.

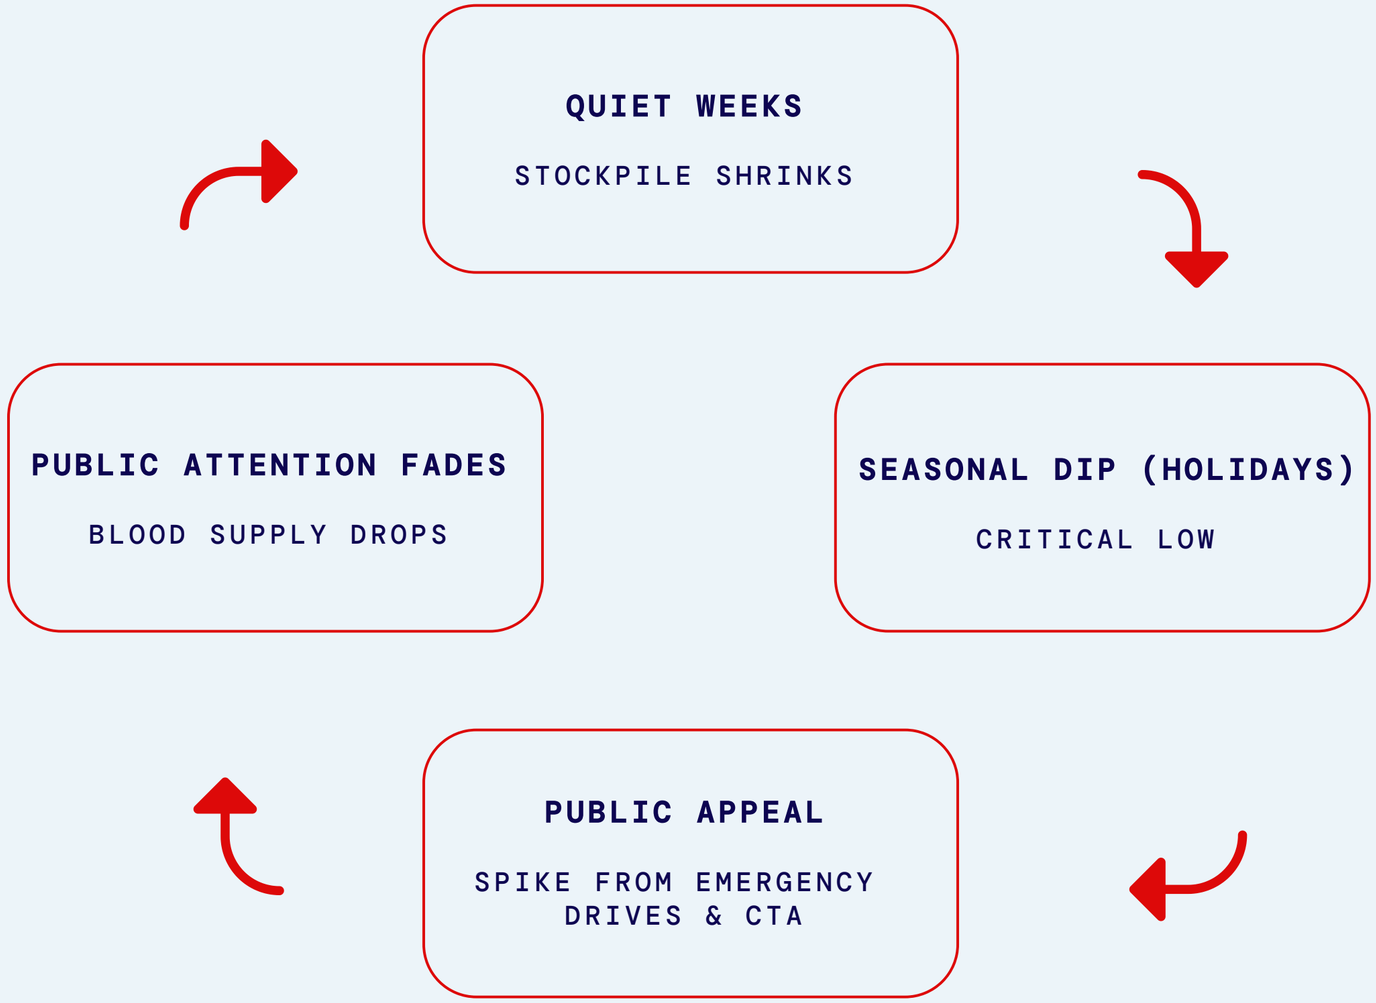

The Health Minster had to make a personal public appeal to recover supply. It grew 2.3x temporarily within a week

Try Pitch

The Pattern

*"We **respond** to shortages.*
*We **rarely prevent** them."*

As demand increases we need to start to prevent them in the first place. Responding will be unsustainable in the near future.

Try Pitch

Existing Solutions – DonateBlood

WHAT IT DOES

Appointment scheduling, donation history, donor card all in one place. A useful app for donors who **already want to donate**

WHO IT SERVES

Designed for the already-motivated donor. You decide when to use the app and it helps you get there. It’s not system initiated

WHAT IT DOESN’T DO

No predictive shortage alerts. No emergency surge capability. No target outreach. No rengagement. No emotional feedback loop. No group booking for donation drives.

THE GAP

DonateBlood solves the how but doesn’t solve the why of donating blood. No sense of emotional urgency and compelling reason to act now.

Try Pitch

Pain Points – Gaps in the System

NO FORESIGHT

Shortages follow a predictable calendar (holidays). Yet there is **no system to forecast them in advance** and recruit donors before stocks hit critical. Currently, it's reactionary

NO SURGE CHANNEL

When a mass-casualty event or outbreak strikes, there is **no rapid channel** to mobilise qualified donors by blood type and location. E.g ministerial public appeal was slow & manual

NO TARGETED OUTREACH

When blood stocks fall critical, HSA's only tool is a public broadcast: slow, untargeted, and reaching non-eligible donors. **Most O-type donors never knew stocks hit 6 days' supply in 2023.**

NO RE-ENGAGEMENT

There is no personalised follow up, no impact feedback, no eligibility reminder. First-time donors are also recruited at a significant cost. **The emotional connection is weak for the donor.**

Try Pitch

Solution – Our Principles

01

Predict

See shortages weeks before they happen. Recruit donors before the gap opens and prevent shortages

- Prevent shortages before they happen
- Give donors the foresight to act early

02

Surge

Provide support for blood during an increase in demand by mobilising donors during crisis instantly

- Mobilise donors fast when crisis hits
- Let as many people know to donate as much as possible

03

Retain

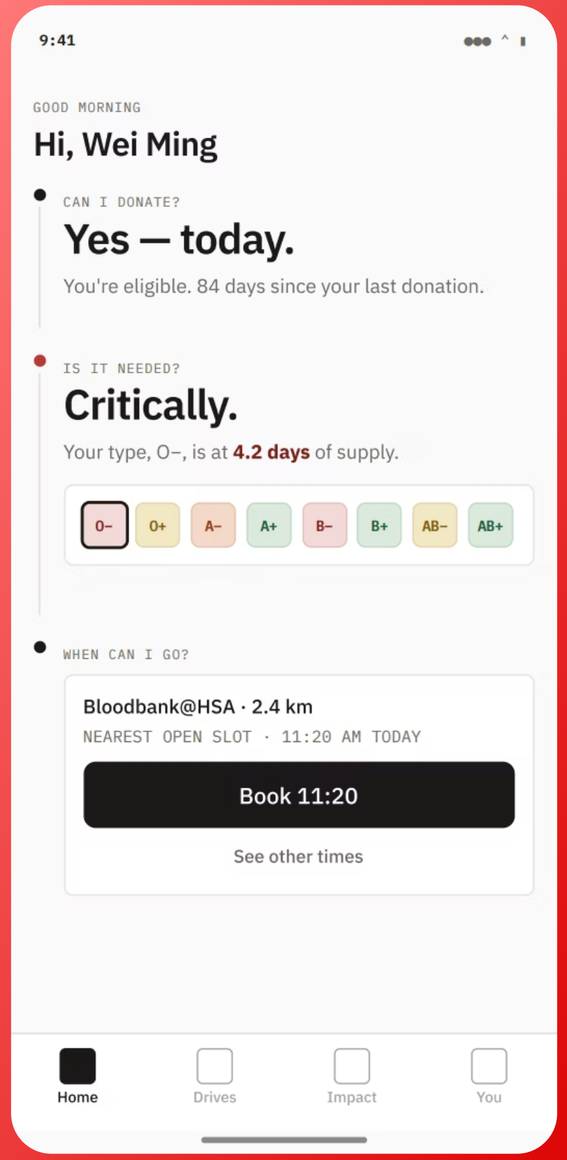

Turn one-time donors into repeat donors to improve blood supply and reduce hurdles for donation

- Improve emotional connection to blood donation
- Make donating blood as seamless as possible

Try Pitch

INTRODUCING BLOODLINE

BloodLine predicts shortages before they hit, mobilise donors when crises strike, and brings back the 60% who never return.

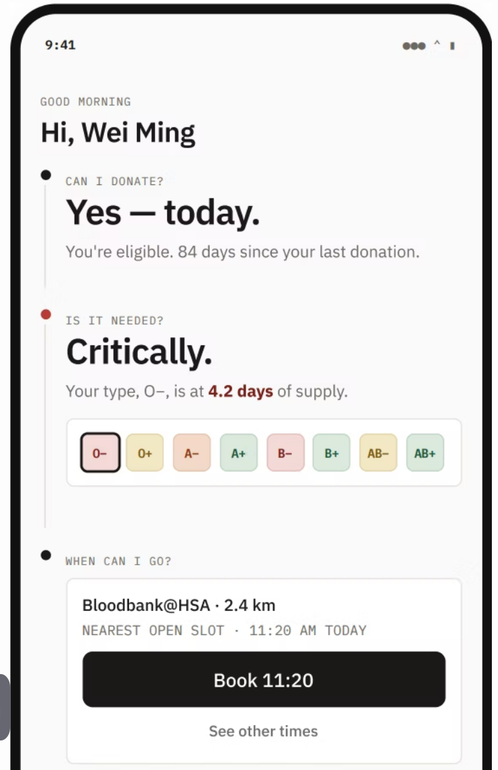

Try Pitch

Predict + Retention

Eligbility & Current Supply

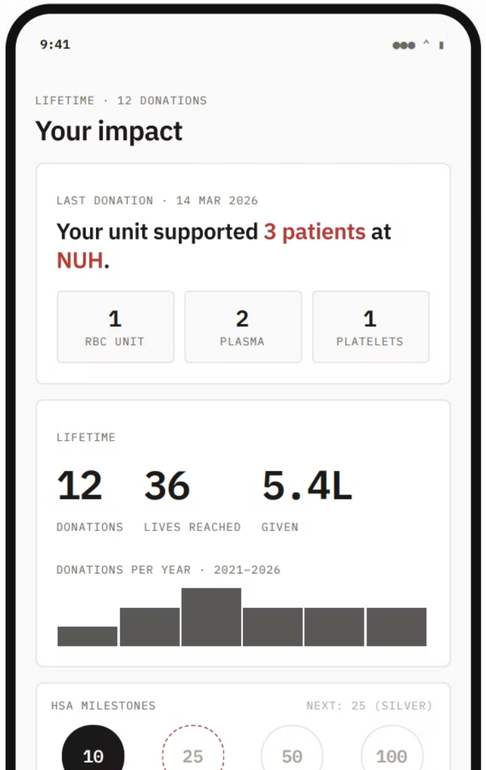

Receive notification and real time updates. Let’s donors know when to donate, enabling constant donations

Retain

View Impact & Achivements

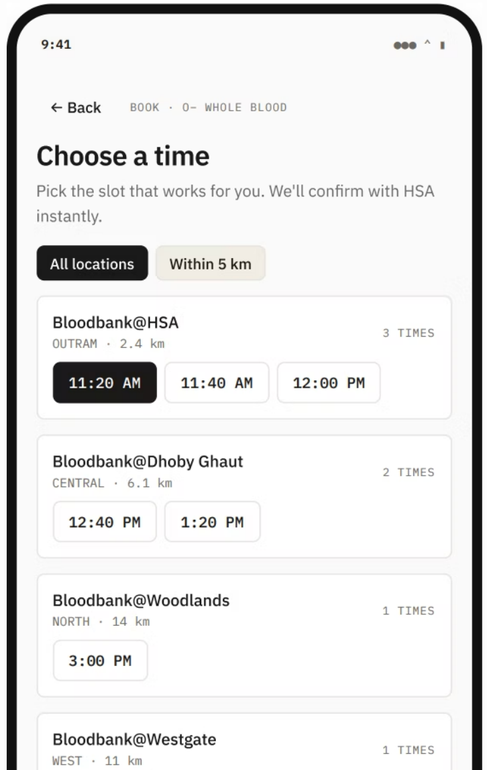

View the lives that you have saved and how much you have contributed to people’s lives

Retention

Schedule

Seamlessly book an appointment for blood donation at the most convenient time

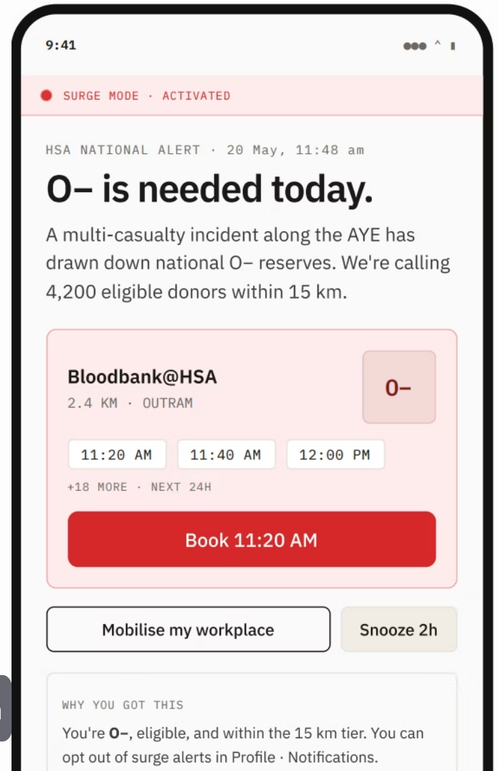

Try Pitch

Surge

Surge Alert

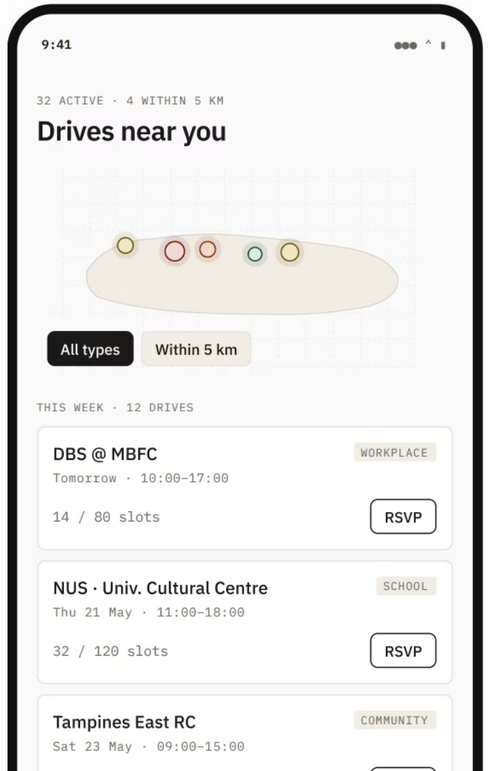

Receive real time alerts about incidents and call for blood supply

Surge + Retention

View / Organise Drives

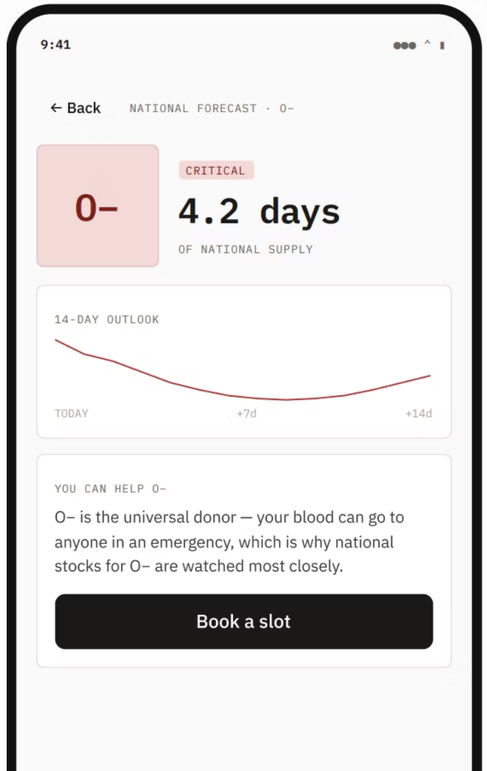

Seamlessly view and organise drives. Less friction means more donors and **retention.**

Retention

Prediction Features

Predict a shortage of blood supply during certain periods to let donors plan in advance

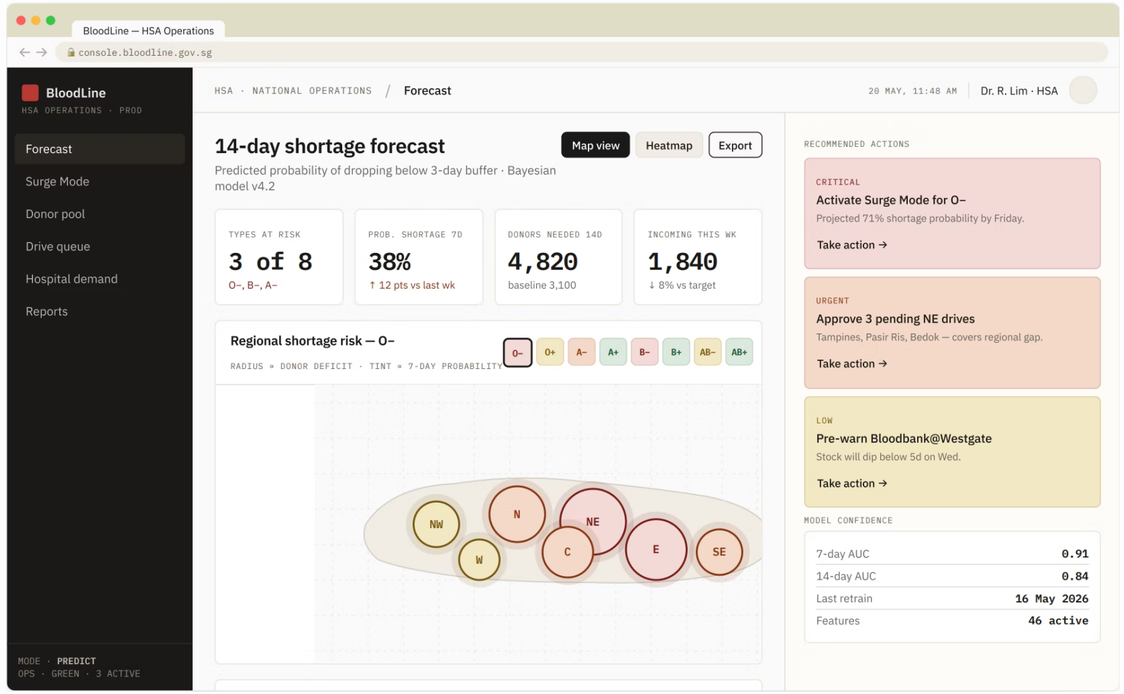

Try Pitch

Map Area - Heat Map

Prediction Forecast

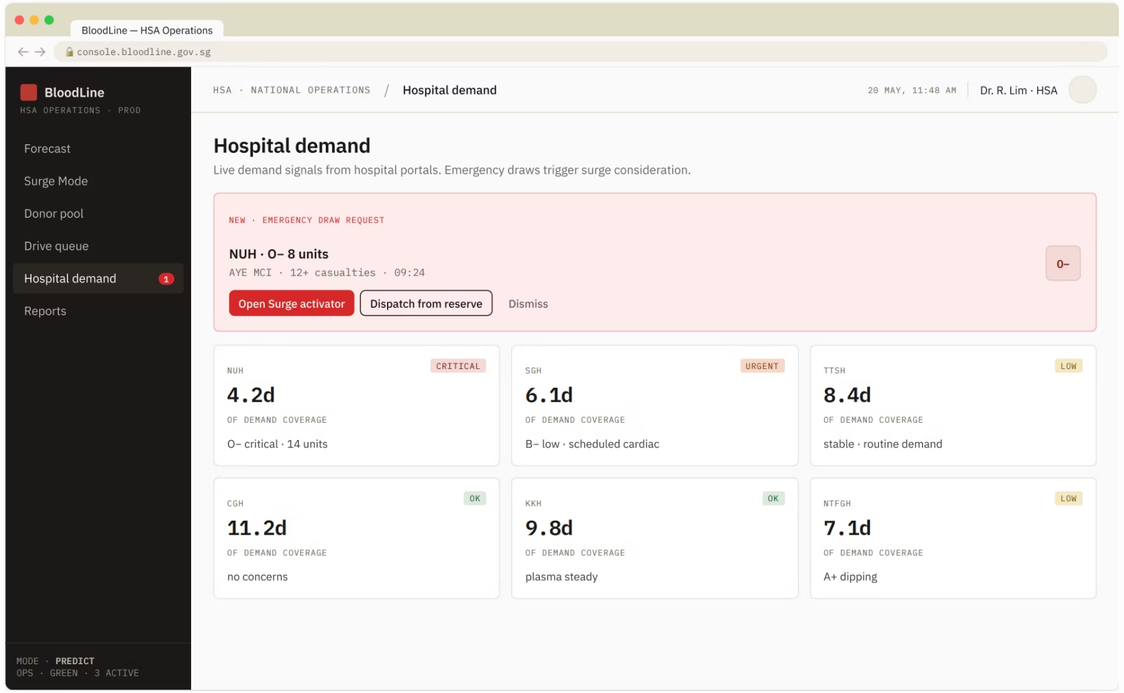

View when and where a place will have shortage in the future

Bird's-eye View

View Current Demand

View demand of hospitals and current supply

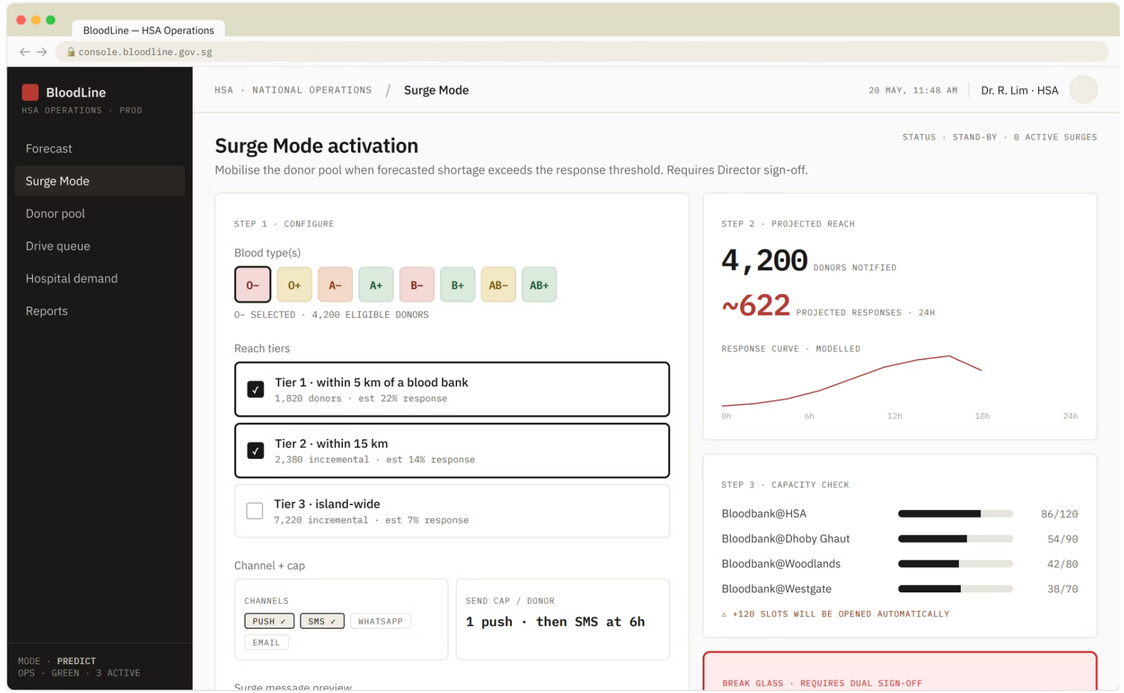

Try Pitch

Activation Tool

Surge Alert Coordinator

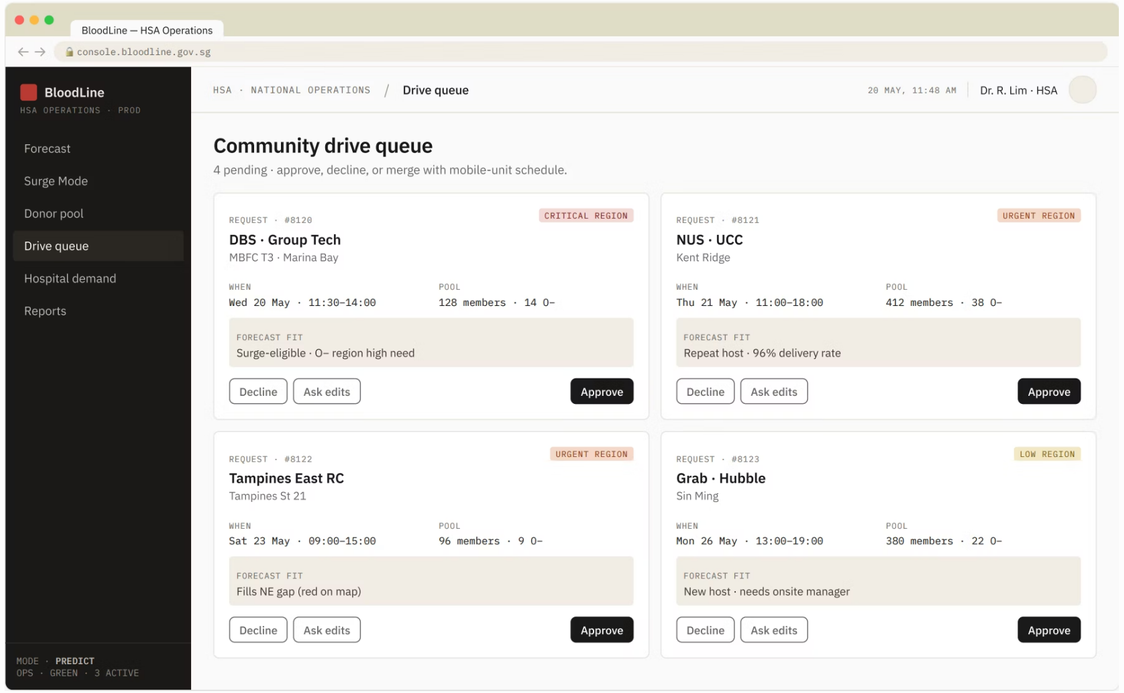

Manage surge activations and review real-time data

Manage Drives

Blood Drive Manager

Manage drives across the island and approve them

Try Pitch

Outcomes

PERSONAL IMPACT

FOR DONORS

- Donors return at higher rates due to emotional impact + usability
- Donors know when their blood type is needed
- Motivation shifts from duty to personal impact

MINISTERIAL IMPACT

FOR HSA

- Shortages are anticipated not announced after they happen
- Crisis response time drops from days to minutes
- Coordinate mobilisation efforts calmly

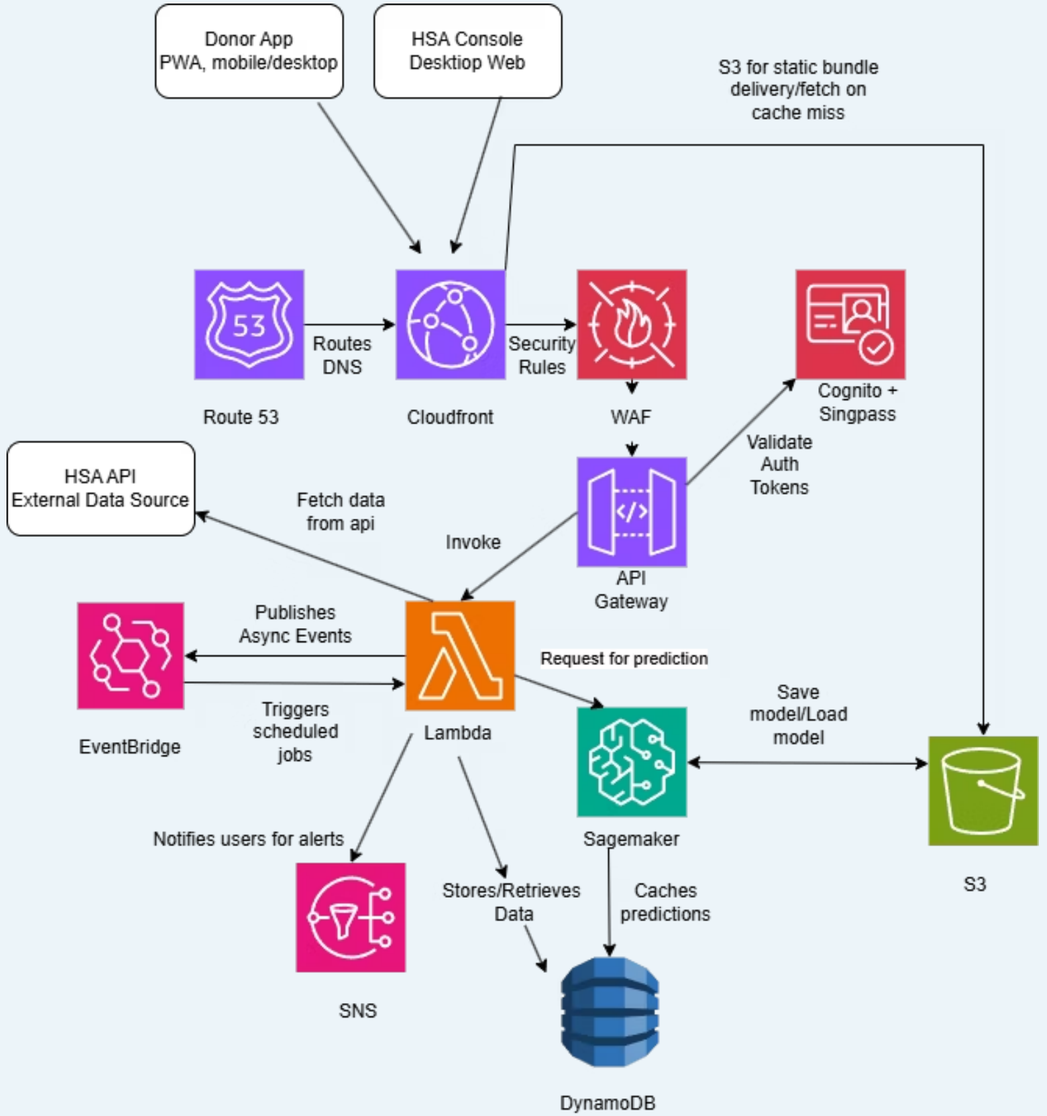

NATIONAL IMPACT

FOR SINGAPORE

- Blood supply resilient enough to meet 160,000 units of annual demand
- Fewer ministerial appeals, the system manages it
